Ghost Tracking App

Livy Wu

Ghost Finder

Ghost Finder is an app which track the location of ghosts. User can add the location that they saw the ghost and also has a description of it.

Personally, I had a experience that shot a ghost in the photo. I know that maybe not real, but it bring me some interest to search about where people had saw the ghost. So this app is also a way that I can locate my track history and track the new ghost location.
